PROFESSIONAL SUMMARY

Robotics and Artificial Intelligence undergraduate (B.Tech, expected graduation 2027) with strong foundations in Python, SQL, Machine Learning, and Data Analysis. Hands-on experience building AI-driven automation projects, including a voice-controlled automated floor cleaner, a home AI assistant, and an automated pipe loading/unloading system, alongside an ongoing project applying machine learning to crop yield and disease prediction. Skilled in Pandas, NumPy, and MySQL, with strong analytical, communication, and problem-solving abilities. Seeking opportunities as a Robotics, AI, or Data Engineering professional.

EDUCATION

Bachelor of Technology (B.Tech) – Robotics & Artificial Intelligence ***Expected Graduation: Jun 2027***
Jawaharlal Nehru Engineering College (JNEC), MGM University

Higher Secondary (HSC) ***Completed: Jun 2022***
Mulana Azad Junior College of Arts, Science & Commerce

Secondary School (SSC) ***Completed: Mar 2020***
M.P Sarosh English High School

PROJECTS

Automated Floor Cleaner with AI Assistant ***Semester 1, 2023***

- Designed a voice-command-controlled floor cleaning system with automatic dirt-level detection.
- Implemented autonomous cleaning logic to trigger and stop operation based on sensor feedback.

AI Home Assistant ***Semester 3, 2024***

- Built a Python-based voice assistant that responds to spoken commands and provides feedback.
- Automated small everyday tasks, similar to commercial home-assistant devices.

Automated Pipe Loading/Unloading System ***2025***

- Developed an automation system to load and unload pipes dispensed from an automated track.
- Integrated embedded hardware and sensors to coordinate the loading/unloading sequence.

Agri AI – Crop Yield & Disease Prediction (In Progress) ***Expected Completion: Nov 2026***

- Building a machine learning application to predict crop yield and detect crop disease.
- Applying data analysis and ML techniques to support agricultural decision-making.

TECHNICAL SKILLS

- Python
- C Programming
- SQL
- Robotics
- Pandas
- NumPy
- MySQL
- Machine Learning
- Data Analysis
- Artificial Intelligence
- Problem Solving
- Communication
